

### Did You Know...

- The #1 chronic childhood disease in America is tooth decay, yet it is one of the most easily preventable.
- An estimated 4 to 5 million children have dental problems so severe they have trouble eating, sleeping and learning. In fact, the U.S. Surgeon General has called dental disease a "silent epidemic."
- American children miss more than 50 million hours of school each year due to dental-related illness.
- Primary teeth help the permanent teeth by saving space for them. A healthy smile can help children feel good about the way they look to others.
- Underprivileged children have twice the incidence of tooth decay, and their disease is more likely to be left untreated.

### What You Can Do To Help

**MAKE A DONATION** and help eliminate the #1 chronic childhood disease in America, tooth decay. It is preventable and we are committed to help! To donate, please fill out the form below and mail it to us. You can also visit us online at [www.mcDCF.org](http://www.mcDCF.org)

**VOLUNTEER** your time. For more information on volunteering, please call us at (415) 472-7974.

**Together we can find those children in need and transform sadness and dental neglect into healthy smiles and happy, productive lives!**

### Yes, I'd like to donate!

Name: \_\_\_\_\_

Address: \_\_\_\_\_

City: \_\_\_\_\_ State: \_\_\_\_\_ Zip Code: \_\_\_\_\_

Phone: \_\_\_\_\_
